HOT NEWS

Queen's return

Legendary British group Queen is back! Their new album is called "The cosmos rocks". It was set out in 18.9. 2008. There are three singers in this group: Brain May, Roger Taylor and their new leader Paul Rodgers. Paul is novice in group Queen .

Album "The cosmos rocks "is inscribed to Freddie Mercury, which died 17 years ago.

There are 14 songs in this album. The songs are fast but also slow. Paul Rodgers is very good singer, but he hasn't very similar voice as a Freddie. It is very good album, but it isn't already original group Queen. But I must tell you as a listener, it is very good album, I like it and I am looking forward next albums.

History of Snowboarding

It is young sport and very dynamic.

It suits people who sigh after adventure and adrenalin.

Its beginnings reach to 60's of 20th century. Some people say that it started already back in the Ice Age. The evidence could be this picture:

The roots of the sport are in the USA. Sherman Poppen so-called „Surfer“ – the modern snowboard.

is, that he built the first his daughter Wendy at Christmas 1965. She wanted to stand up on her sled. He put together two skis from local drugstore for her. The Snurfer was very successful on the market, but people thought it was just a toy for kids. Later, people started to like the idea and organize competitions. That's how the snowboarding became a sport.

Here is some snowboard vocabulary for beginners:

Goofy: you stand on the board with right foot in front of the left foot.

Grab: you grab the board during the flying

One foot ride/jump: ride or jump with only one foot in the binding
